

FINCONS FOR INSURANCE

■ SCENARIO

Today Insurance companies need to provide products and services with the best UX, leveraging new digital channels. On the other hand, they need to improve operational efficiency to reduce cost, increase profitability and guarantee better customer service.

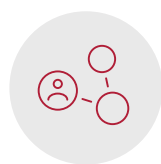

By combining flexibility and a proven expertise in digital innovation, we satisfy customers' needs, providing digital solutions which generate value, simplify processes and free up financial resources.

■ PROPOSITIONS TO DRIVE DIGITAL INNOVATION

DIGITAL CHANNELS

Web & Mobile app development for better UX and solid customer relationships.

SALES NETWORK EFFICIENCY IMPROVEMENT

Digital portals for brokers, intermediaries, agents and sales networks for improving productivity and sales.

OPERATIONAL EFFICIENCY IMPROVEMENT

Solutions to streamline and automate processes leveraging AI technology to reduce cost and ensure high quality outcomes.

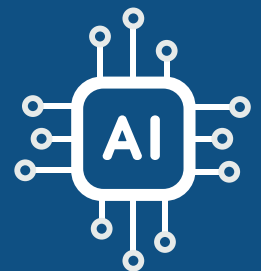

IT MODERNIZATION

Moving applications to the cloud through micro services and containerization both using a lift and shift approach and re-platforming.

DATA EXCELLENCE

Data management and data platforms, both using classical technologies and adopting advanced solutions for fast data and data governance.

AI BOOST FOR DIGITAL INNOVATION

Each proposition can be further enhanced by integrating the most suitable AI technologies, selected based on specific use cases
