Intelligent Automation Solutions

SS&C Chorus Document Automation

Digitize, classify, and extract data with AI

Data makes all the difference

Chorus Document Automation is the proven platform for reading, enriching, and delivering data from paper, images and PDFs. It enables businesses to accept end-customer information in any form and turn it into decision-ready data.
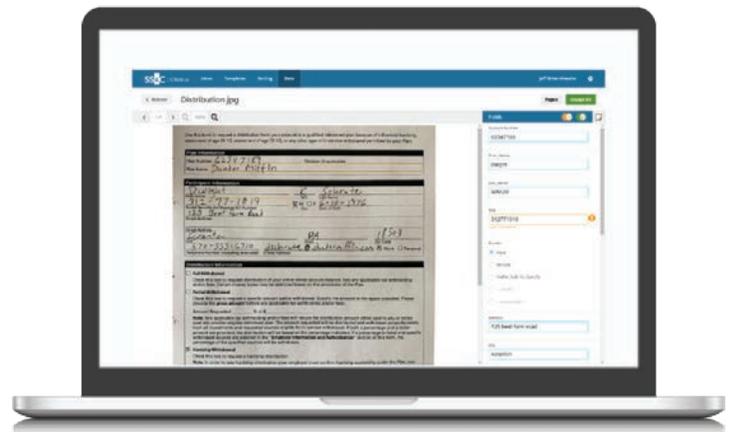

With Chorus Document Automation at the front of your automation strategy, your work is intelligently extracted, prioritized, contextualized and routed to fit directly into your current business processes, improving your downstream workflow.

Speed. Power. Accuracy.

Chorus Document Automation is a central link between inputs – the mailroom, digital portals – and downstream CRMs, enterprise content management systems, and business process management engines.

Chorus Document Automation:

- Surpasses human accuracy where it counts: identifiers like Tax ID numbers and monetary data
- Increases throughput rates and lowers cycle times
- Scales to meet throughput demands of your largest and most complex workflows
- Eliminates paper backlogs and non-standard workflows

98%+ average document extraction accuracy

1000x faster than humans

**50%** increase in straight-through processing

80% reductions in manual staff effort

How Chorus Document Automation works

Chorus Document Automation provides a comprehensive solution for extracting handwriting and low-quality machine print from paper and turning it into automation-ready data. With Chorus Document Automation, you can continuously extract data from new documents as they come in to save time and reduce costs, and digitize historical data to feed machine learning models or provide a searchable repository.

1. Vision
Automated Document Identification

3. Transform
Data Validation, Enrichment, Normalization

Automation-Ready Data

2. Read
