

Brokers process more business, with less resource, faster, with Websure

Websure is the perfect system to automate the entire broking life cycle so you can service clients and carriers quickly and professionally.

If you are a direct, London or wholesale broker we can automate your open market or binder processes – so you can concentrate on generating new business and improving client service.

Whether you want to cater to online savvy clients with transactional websites, automate multi-subscriber placing, settle accounts with carriers using messaging or get the MI you need with real-time dashboards – Websure is the all-encompassing solution.

With Websure you can process business quickly by reducing administration time and having the control to distribute and sell on your timeframe.
